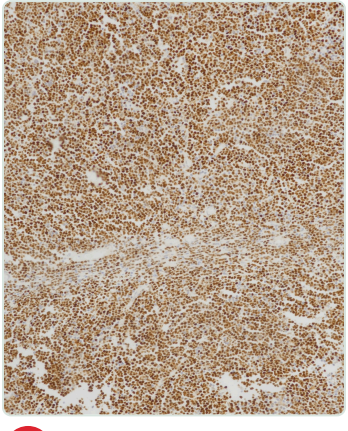
Cyclin D1

ARB6724

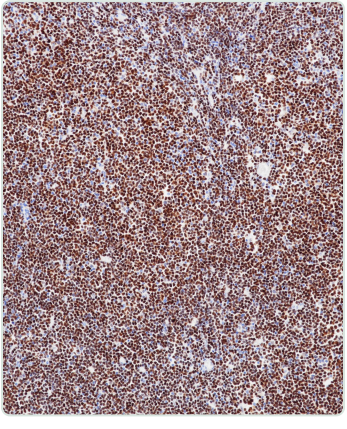
Cyclin D1 Rabbit Monoclonal Antibody(ARB932)

Optimal

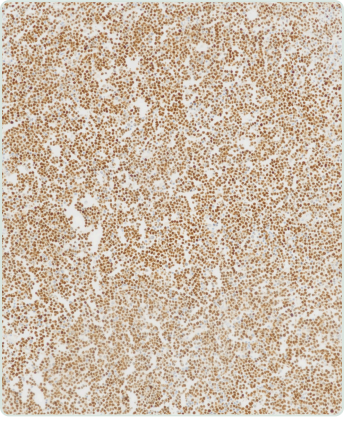
Autostainer-Agnostic. Across the ARExBs, ARExDs and ARExRs series, AREX antibodies are developed to support broad applicability across commonly used automated IHC staining systems, including Leica Bond, Dako and Roche systems. They are not positioned as system-exclusive products, but as high-quality antibody raw materials built for flexible adoption across different staining workflows.



AREXBs Mantle cell lymphoma



AREXDs Mantle cell lymphoma



AREXRs Mantle cell lymphoma
